

1GHz ULTRA-MINIATURE LOGARITHMIC AMPLIFIER

750 MHz to 1250 MHz

Log Linearity at 1000 MHz +/-1.0dB

**Linearity over Temperature
and Frequency +/- 2.0dB max**

The Pascall Ultra-Miniature series of Logarithmic Amplifiers provide broadband performance and superb linearity over a wide temperature range. The UMLA 1-500 extends the existing range to 1 GHz centre frequency with broadband 500 MHz performance.

The UMLA ranges of logarithmic amplifiers are robustly constructed in lightweight aluminium alloy housings and are designed to withstand harsh mechanical environments.

This range is specified for operation over a case temperature range of -45°C to +85°C.

Supply voltage options are +/- 12 Volts and +/- 15 Volts with a total dc input power of 2.25 Watts.

The small size and weight makes these units an ideal choice for compact airborne equipment designs where low power dissipation is vital to maintain high reliability and performance.

Pascall has a large range of alternative logarithmic amplifiers covering centre frequencies from 10 MHz to 1 GHz and is also able to design models to meet customers' specific requirements.
